And finally, Supercell didn't stand out of the game when it recently launched a fairly similar MOBA game called Clash Royale Brawl Stars. The game supports the iOS platform before and will support the Android platform and allows you to download it completely for free. GameplayBrawl is a top-down shooter that looks like games like Star League of Legends or Bomberman. Before starting a match, the player must select any character you have (in this game called Brawler). Each Brawler has different weapons and special skills, so you need to make sure you match your teammates to build strong teams. Collaborate with your friends and win fierce combat. Not to stand there, Brawl Stars is a real-time game that allows you to shoot guns with everyone around the world. The game becomes more interesting when good players create a lot of unique tactics. MOBA is a pretty difficult PC game from a PC because it has a lot of complexity that requires players to train and learn thoroughly, but this game has raised many details to create a funny MOBA game on mobile, it's easy to play and helps it doesn't take much time to get to know. Unlike other MOBA games, which are limited to three main lanes, Brawl Stars' maps are a huge arena that allows players to fight constantly throughout the game. However, don't be too passionate to fight and forget the team's big goals, destroy towers and take treasure, don't give opponents a chance to win. Choose your Brawler You will receive a lot of gold and experience points after you join the fight. Use this gold to unlock more brawling like in the store of the game. Each Brawler's first character has a different weapon like Shelly. She is a beautiful girl with purple hair, a weapon capable of firing a powerful cone bullet in her weapon, distributing damage to many enemies at a time. Another character jessie, he does not shoot conical bullets but just a straight line. This brings a little harder, but he has another skill that creates automatic weapons to shoot nearby enemies (such as League of Legends Heimerdinger). In addition, there are many other brawlers to explore such as bull, Brock, Crow, Poco, Nita, etc. There is no weak character if you can use your powers. You can learn tips from other great players in the Brawl Stars community around the world.4 main modesInclude:Bounty: Teams will be the winning team in star collection mode to collect more when time ends. Similar to Smash & Grab: Bounty, in this mode, you need to collect 10 Crystals on the map, the winner who finishes first. Heist: Fighting mode. Showdown: The survival mode, in which 10 players fall on a single map, wins no matter who the last survivor is. You can also play with your friends in 3v3 matches. The game honors the best players, win and conquer the ranking of the game. GraphicsBrawl Stars are similar in style to previous Supercell games. Although this is a violent action game, the graphics of the game have been developed in a very bright and gentle animated style. The characters are cute, funny, although they are warriors with tremendous power. In my opinion, the graphics of this game are quite good, suitable for those like light games. As a result, the game easily runs on weak configuration devices, providing many player experience.
